Fowler's Improved Patent Sterilizers are fitted with a Hinged Heat Protector—which has hitherto been fixed—thus facilitating cleaning.

The close fitting lids reduce escape of steam to a minimum.

The Sterilizers may be used on an Aga or Esse Cooker, Electric Stove, Kitchener, Gas Burner or Oil Stove.

Any make of bottles may be used in them, from one to the full capacity, without packing in any way.

STAINLESS STEEL "STAYBRITE."

Fowler's Sterilizers, Tea Urns, Jam Funnels, Drop Funnels, Hydrometer Stands, etc., are also made in Firth "**Staybrite**" Super Stainless Steel, the properties of which are now generally well appreciated, and amply repay the extra cost. The initial expense is practically final.

This Steel has exceptional strength and will not rust or form verdigris. It is stainless throughout, and as its name implies its bright finish is everlasting. Cleansing is carried out by wiping over with a damp leather only.

For prices see pages 8, 9, 24, 30, 33 and inside back cover.

LET US QUOTE FOR OTHER ARTICLES MADE IN "STAYBRITE," also COPPER and TIN.

"ZETT" for Home Jam Making.

"ZETT" is a pure fruit pectin in powder form which simplifies jam making enormously. It cuts down the time and labour involved by three-quarters, secures a much greater yield while preserving the full fresh flavour of the fruit, and secures perfect setting without the long, tiresome boiling required by old-fashioned methods. "ZETT" is made by "BOVRIL, Ltd."
